G *Gold*
S *Standard*

DESCRIPTION

With the HWB-G-S buttons, the user interfaces with the ACT D'MAND Kontrols® System by simply pushing the button, before using hot water. The button's low voltage signal is sent back to the pump to initiate a cycle. The pump sends ambient water in the pipes, via the cold water line, back to the water heater (either tank or tankless) while rapidly pulling the hot water from the water heater to the furthest fixture.

TECHNICAL DATA

WIRING is done in parallel or "home run" from each button back to the D'MAND Kontrols® System. (NOT IN SERIES!)

Cat5, bell wire, thermostat wire or any gauge of wire between 24 ga and 18 ga are recommended

APPLICATION

The HWB-G-S is a momentary contact button that is compatible with any ACT D'MAND Kontrols® System from 1991 to Present.

There is no limit on the number of Hard-Wired buttons that you can use with a system.

Works in conjunction with ALL D'MAND Kontrols® Systems, and BP-W, BP-B, BP-STs

DIMENSIONS

WARRANTY
