## AIRLET™ 100

### Rectangular Self-Regulating Fresh Air Inlet

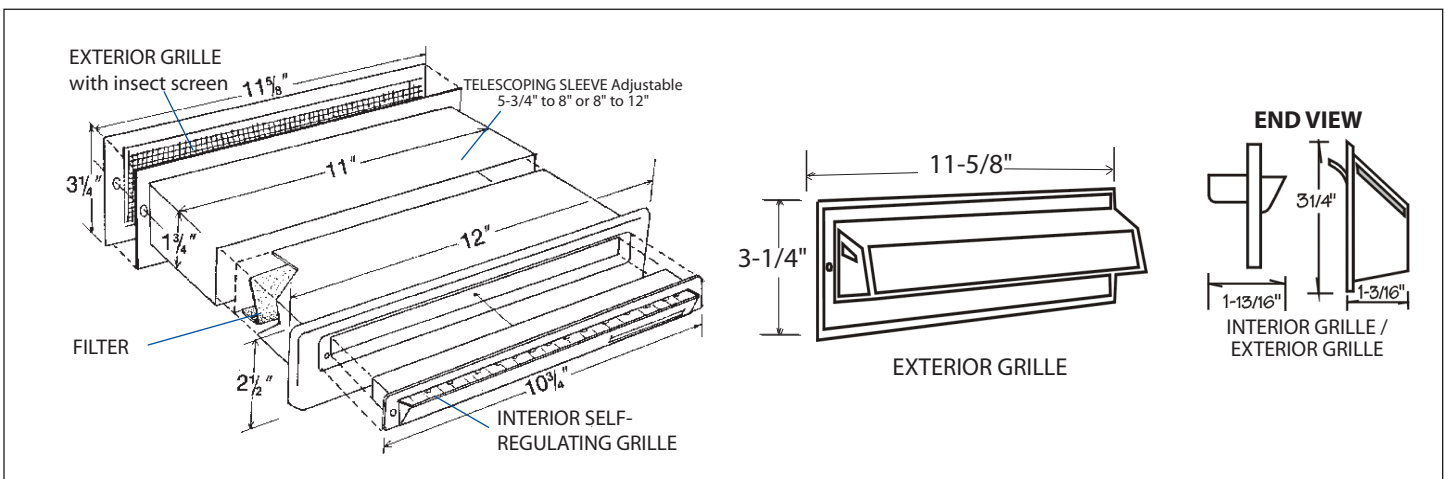

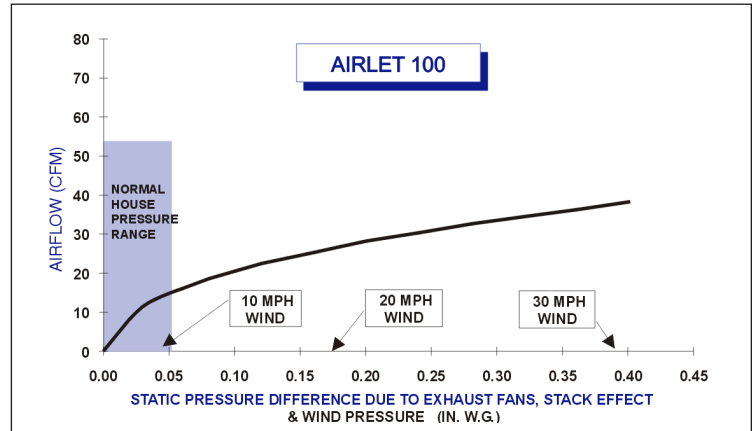

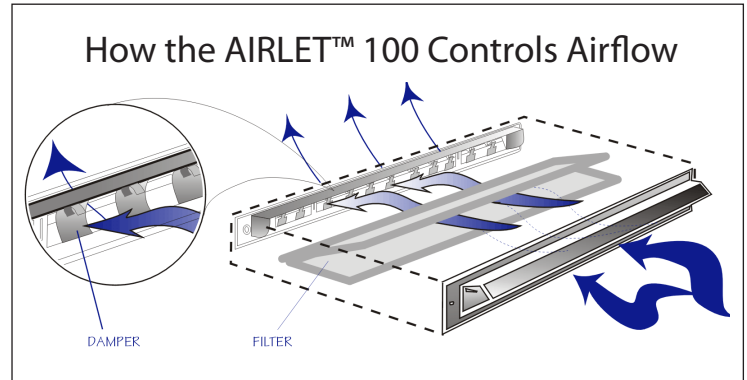

PRODUCT SPECIFICATIONS & TECHNICAL DATA

#### DESCRIPTION

The AIRLET™ 100's rectangular design and the horizontal lines of its interior and exterior grilles make it unobtrusive in most decors.

The AIRLET™ 100 may be installed before or after the interior and exterior surfaces have been applied. Two telescoping sleeve combinations are available (5-3/4" to 8" and 8" to 12") to accommodate different wall thicknesses. A rough opening of 1-3/4" x 11" is required. Exterior and interior grilles are made of white plastic. The interior grille, which incorporates a flow regulating damper, deflects a thin ribbon of fresh air upwards. In this manner, the AIRLET™ 100 provides draft-free fresh air that quickly mixes with warmer air near the ceiling. A filter is provided in the sleeve, and it may be accessed for cleaning by removing the screws on the interior grille. The AIRLET™ 100 requires no manual controls.

#### COMPLETE UNITS & ACCESSORIES

P/N: 11 538	AIRLET™ 100 with 5-3/4" to 8" Sleeve	P/N: 11 539	AIRLET™ 100 with 8"-12" Sleeve
P/N: 11 414	Replacement Filter	P/N: 11 565	Sound-Absorbing Insert (2-1/2" or 5-1/2")

Note: AIRLET™ 100 for 2" x 4" walls is available on a special order basis. Units may be provided with sound-absorbing inserts or without exterior grilles (in the case of under-the-siding installations). Consult the factory for more information.
