DATA

DESCRIPTION

The AIRLET™ 200 offers unparalleled airflow regulation performance. Its unique design assures draft-free fresh air. An interior grille, which may be oriented as necessary, is an added advantage.

A round design permits easy installation after the interior and exterior surfaces have been applied. One standard telescoping sleeve accommodates wall dimensions from 5" to 9" thick, surface to surface. Additional lengths may be special ordered. A rough opening of 5-1/8" is required for installation.

The AIRLET™ 200 is available with either a white epoxy painted exterior grille or a mill finish aluminum exterior grille that may be painted. The interior grille is made of white plastic and extends only 5/8" from the wall. It is easily removed without tools to access the filter in the sleeve. There are no manual controls to remember to reset.

AIRLET™ 200 make-up air inlets are self-regulating. The controlling element is a plastic damper that automatically adjusts the free opening to provide a draft-free regulated amount of incoming air, independent of wind pressure. (See performance charts at right.)

COMPLETE UNITS & ACCESSORIES	
P/N: 11 555	AIRLET™ 200 w/White Exterior Grille (5"-9" Telescoping Sleeve)
P/N: 11 556	AIRLET™ 200 w/Aluminum Exterior Grille (5"-9" Telescoping Sleeve)
P/N: 23 853	Replacement Filter

Note: AIRLET™ 200 may be provided without exterior grilles in the case of under-the-siding installations. Consult the factory for additional information.
