

Attic Breeze®

#2

Hot attic air is displaced by cooler, ambient air drawn in from the intake ventilation.

#1

Attic Breeze® actively removes hot attic air and humidity keeping the attic cooler & dryer.

#3

The less heat there is in the attic, the less heat there is in the home resulting in a HVAC system that works less saving both energy and money.

HOW DOES IT WORK?

LOWERS COOLING COST

INSULATION WORKS BETTER

HVAC SYSTEM PERFORMS MORE EFFICIENTLY

SHINGLES LAST LONGER

WORKS HARDEST WHEN YOU NEED IT THE MOST

REMOVES MOISTURE & HUMIDITY BUILD UP

WE ARE SOLAR POWERED VENTILATION
