

# CSF4 Crawlspace Ventilation Fan

Protect the Home's Integrity & Longevity

## Breathe easy with targeted, effective crawlspace ventilation

## Out of Sight/Out of Mind

Fundamental to the structural integrity and longevity of a home, a crawlspace solution will help:

- Block the growth of mold and mildew
- Prevent structural damage such as warped and rotting wood
- Improve the overall air quality in the home
- Halt pest infestations like termites, rodents and insects that are attracted to damp environments
- Protect the insulating properties of building materials
- Prevent excess moisture from accumulating, which can lead to corrosion and other types of damage on household equipment

### CSF4 Removes Stale Air

Pulling fresh air into stale areas, CSF4 is an AC-motored, durable ventilation fan featuring:

- Low noise operation
- Corrosion-resistant housing
- Built-in thermal overload protection with auto reset
- ENERGY STAR® certified

### Vibration Welded Construction

- Vibration welding joins the two halves to create a single housing
- Inherently air tight

### Easy to Install & Maintain

- Bearings permanently sealed/self-lubricating results in maintenance free-life
- Large, electrical wiring enclosure makes installation easy

To exhaust air in a crawlspace, choose this solution:

**CSF4**  
79415 & 79415A
